

Humber River Hospital. Lighting New Ways In Healthcare.

Humber River Hospital (HRH) is one of Canada's largest acute care hospitals, fully digital, and serving a diverse catchment area of more than 850,000 people in the northwest Greater Toronto Area. HRH operates 722 acute inpatient beds with 3,400 staff, approximately 700 physicians, and over 1,000 volunteers. HRH currently includes the Wilson site, a 656-bed full service acute care facility that opened in 2015, and the Finch and Church sites, known as the "Reactivation Care Centres" (RCC). The RCCs represent a unique partnership among multiple hospitals in the GTA with a focus on high quality patient recovery. A 356-bed long-term care facility "Humber Meadows" is currently under construction at the Finch Avenue site.

Our vision of *Exceptional Care, Healthier Community* and our focus on equity and inclusivity is something we share with our partners at the North Western Toronto Ontario Health Team. As Canada's first digital hospital and home of the first Patient Care Digital Command Centre, a commitment to innovation, research, and academic excellence remains at the core of our organization. We look forward to further development of these core elements through our recent membership in the Toronto Academic Health Sciences Network (TAHSN).

As an associate member of TAHSN, HRH provides many academic opportunities to all professions. We are committed to establishing a Family Medicine Teaching Unit in partnership with the University of Toronto within the year, further strengthening our commitment to academic excellence.
