

Update on Mental Health and Addictions Policy in Ontario

Modernizing the Health Sector

**Presentation to AGHSP 9th Annual
Leadership Summit**
November 8, 2019

Vision

A modern, integrated and sustainable public health care system

Better health care experiences and easier transitions

Consistent, high-quality care and health promotion

Appropriate care when and where it's needed

"Our government is committed to an Ontario where patients don't need to be in crisis to get the mental health and addictions treatment they need, when they need it. We will continue to make mental health a priority and work toward creating an Ontario where everyone is fully supported in their journey toward mental wellness."

The Hon. Christine Elliott, December 19, 2018

“This is why Ontario’s Government for the People is committed to investing \$3.8 billion for mental health, addictions and housing supports over 10 years.... Beginning with building a mental health and addictions system focused on core services embedded in a stepped-care model, and a robust data and measurement framework.”
